H1N1 Nasal spray (flu mist) available for healthy people, 2-49

The H1N1 nasal spray vaccine, known as Flu Mist is available for people between the ages of 2 and 49 with no chronic health conditions, who are also not pregnant. Pictured below is Iris Earle, age 2 years old and mother Angie Earle, both Brimfield residents, at the high-risk clinic held Saturday November 14, 2009 at Ravenna Elks Lodge. Iris received the nasal mist from Portage County local health departments vaccination team. The Portage County local health departments would like to especially thank the Ravenna Elks for donating the space. We are very grateful to have these community leaders who are willing to lend a helping hand.
